Claims Rejected

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 62-122 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 62, line 13, "the fifth shifting element" lacks an antecedent. The dependency of every claim that depends on claim 61 is improper, since that claim has been canceled.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 62-122, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Beim '924. Beim shows a planetary gearing with a brake B3 (applicant's element A), a brake B4 (applicant's C), brake B1 (applicant's D), clutch CL3 (applicant's B), clutch 104 (applicant's E), a first 32, second 34 and third 36 gear set, an input shaft 24 penetrating the first two gear sets, an output shaft 30 fixed to the carrier 58 and ring gear 40, the input shaft 24 fixed to sun gear 46, a connecting member 50 connecting the second carrier to the third ring gear, and a connecting member connecting ring gear 48 to carrier 42. The functions of the transmission appear to be identical to applicants.
